

Chiranjeev Kumar

Data Science Consultant – Generative AI, LLMs
Bengaluru, India — chiranjeevkumar47@gmail.com +91-9546519953
[linkedin](https://www.linkedin.com/in/chiranjeev) — github.com/chiranjeev Kaggle: [chiranjeevbitp](#)

SUMMARY

Experienced Data Science Consultant specializing in Generative AI, Large Language Models (LLMs) and agentic systems. Proven track record designing, developing and deploying production-grade GenAI and RAG solutions on Azure, Dataiku, and cloud platforms. Strong engineering background in data processing, vector search, multi-agent architectures, prompt engineering and responsible AI. Experienced in building end-to-end LLM applications in Dataiku.

EXPERIENCE

Deloitte

Data Science Consultant

Bengaluru, India

Oct 2024 – Present

- Lead design and delivery of incubator GenAI COE projects: built multiple POCs and production pipelines for RAG, multi-agent frameworks and MCP (server/client) deployments across Azure, NVIDIA DGX and AWS.
- Architected an RFP automation system (content extraction, chunking, vector indexing, Azure OpenAI inference, Azure AI Search) underpinning enterprise proposal generation and similarity-based retrieval.
- Developed an NLQ-to-SQL agent in Dataiku, enabling business users to query enterprise databases using natural language; implemented automated evaluation metrics (SQL correctness, latency) and integrated output visualization dashboards within Dataiku Flow for end-to-end analytics.
- Managed production lifecycle: model/version management, prompt versioning, monitoring (Azure Monitor / Insights), and incident escalation—improving response stability for GenAI apps in production.
- Conducted multi-agent & RAG trainings for AI practitioners (233 participants); received Applause Award and Outstanding Performance Award for contributions to Bechtel GenAI RFP project.
- Delivered two production-ready GenAI solutions for a prioritized client use case (Bechtel) as part of an initial ~\$1M scope to implement 4 GenAI/Agentic AI use cases; the solutions reduced proposal preparation time by ~50% (e.g., typical turnaround from 4 weeks to 2 weeks) and are being productionalized—pipeline interest across GBUs forecasts a healthy \$5M+ opportunity.

Tredence Inc.

Data Scientist

Bengaluru, India

May 2023 – Oct 2024

- Developed end-to-end item-matching solution for a supermarket chain: combined internal + external datasets, LLM-based information extraction (brand, pack size, pack count) and rule-based reconciliation to automate catalog normalization.
- Evaluated multiple GenAI platforms (Dataiku, Databricks, Vertex AI) for feasibility analysis: benchmarked embedding generation, vector search latency, model inference throughput, and cost-performance trade-offs to inform platform selection for enterprise-scale RAG deployments.
- Designed RAG pipelines and fine-tuned LLM prompts to improve retrieval precision for product attribute extraction; integrated workflows with downstream analytics dashboards.
- Collaborated with engineering to productionize inference on cloud GPUs, ensuring latency and cost trade-offs aligned with business SLAs.
- Reduced average manual matching time per item by ~60% (e.g., from roughly 10 minutes to ~4 minutes per item) which materially shortened catalog onboarding cycles and operational processing time.

Soroco

Machine Learning Software Engineer

Bangalore, India

Dec 2021 – Apr 2023

- Developed ML models and feature engineering pipelines for large-scale behavioral data analysis; implemented model evaluation and A/B testing frameworks.

Tata Consultancy Services (TCS)

Associate Software Developer

Bangalore, India

Nov 2020 – Dec 2021

- Developed cloud-native services using Azure App Services and REST APIs; performed ETL and data validation for enterprise ingest pipelines.

EDUCATION

Liverpool John Moores University

Master's degree, Machine Learning and AI

Mar 2022 – May 2023

- Grade: 73% (Distinction).

International Institute of Information Technology, Bangalore (IIITB)

Postgraduate Degree, Machine Learning & AI

Apr 2021 – Mar 2022

- Grade: 3.5/4.0. Focus: statistics, NLP, deep learning, reinforcement learning.

Birla Institute of Technology - Mesra

Bachelor of Engineering (B.E.), Computer Science and Engineering

2016 – 2020

- Grade: 7.8/10 CGPA.

SKILLS

Languages & Frameworks: Python, PySpark, SQL, Flask, React, Streamlit, Pandas, NumPy, Scikit-learn

GenAI & LLMs: Prompt engineering, prompt-tuning, fine-tuning, RAG, LangChain, LangGraph, Haystack, agentic systems, multi-agent orchestration, guardrails, hallucination scoring, retrieval pipelines

LLM Deployment & Inference: Azure OpenAI, Azure AI Search, Azure ML, (NVIDIA DGX), batching strategies

Dataiku: Dataiku Flow, visual recipes, code recipes, plugin development, prompt studio, knowledge banks, LLM mesh, vector stores, prompt management, Dataiku API

MLOps & Observability: CI/CD, MLflow, DVC, experiment tracking, monitoring (Azure Monitor / Insights), logging, incident management, human-in-the-loop escalation

Tools & Platforms: Kubernetes, Docker, GitHub Actions, Terraform, NVIDIA Nemo Toolkit

Security & Responsible AI: PII detection/redaction, adversarial robustness checks, data lineage

Other & Productivity: Vibe coding expert (Windsurf, Cursor, Copilot), workflow automation (n8n), Claude code, Openclaw.

AWARDS & RECOGNITION

Deloitte Applause Award for training enablement and knowledge-sharing in GenAI.

Deloitte Outstanding Performance Award for technical contributions to the Bechtel GenAI RFP project.

Multiple internal recognitions for rapid prototyping of GenAI POCs and production hardening.

Tredence Pat on the Back Appreciation Award for excellent performance.

CERTIFICATIONS & HIGHLIGHTS

Google: Generative AI For Leaders (*Issued Jan 2026*)

NVIDIA: Certified Agentic AI (*Issued Dec 2025*)

Dataiku: Core Designer Certificate

Dataiku: Generative AI Practitioner Certificate

Google / Coursera: Google Advanced Data Analytics (*Issued Aug 2024*)

Microsoft: Microsoft Certified: Azure Data Scientist Associate (*Issued May 2024*)

Coursera: Prompt Engineering Specialization (*Issued Feb 2024*)
